About This Game

Ultra-Gene Code is a sci-fi visual novel about good purposes being achieved by not-so-good means. Become part of a mysterious story that constantly confronts you with a difficult moral choice.

The near future. Not so long ago, a perfect AI was created and successfully introduced into all major spheres of production, and now science is ready to take another outstanding leap forward. Here, in the Ahasverus-8 laboratory, a new project which will change the life of humanity forever has been carried out.

Take on the role of Aria, the cutting edge in AI, designed to streamline the work of the laboratory and help the employees. The objective of research is classified and they keep it secret even from you, but this is only one thread from a veil of mysteries and omissions enveloped this project. Try to get some answers and find out the purpose of the project while staying in the background.

Remember that your choices impact the flow of the story and have sometimes irreversible consequences.

Vaporum in Grid-Based Crawling Bundle!:

Hey guys!

We have teamed up with fellow grid-based dungeon crawlers released in recent times to create a bundle! It's a "complete the set" bundle, which means that you will only pay for the games you don't own yet, and all that at a **25% discount** (cumulative with any discounts the games may be currently running).
